

I'm not robot!

Not long ago, Dell gave its stylish XPS 15 multimedia laptop a mobile workstation makeover and designed a winning workstation. The Precision 5530, our current choice of editors between the design, editorial and rendering set, and the scientific data processing set. This left the XPS 15 2-in-1 pleading for the same treatment, and the result was the Precision 5530 2-in-1 (starting price of \$1,679; \$2,860 as tested): a hybrid with its clamshell cousin's ISV (Independent Software Vendor) certification chops, plus the possibility to turn and fold from laptop to tablet or mode presentation. Like all 15.6-inch convertibles, it is too heavy for comfortable use as a tablet, but it is a surprisingly powerful option for creative professionals who want flexibility. Multimodal. Artifacts on a chip say "surprisingly" because XPS 15 2 in 1 (\$1,329.99 at Dell) (Opens in a new window) did not allow surgery that starts 90 of the 100 mobile workstation conversions, i.e. replacing a Nvidia GeForce or AMD Radeon consumer GPU with a Quadro or Radeon Pro part. The Radeon RX Vega graphics silicon from XPS 15 2-in-1 is integrated in the same package that contains the Intel Core i7 CPU. The same goes for the Precision 5530 2-in-1 and its workstation version of the bundle: the Core i7-8706G (opens in a new window), which combines a 3.1GHz quad-core processor (4.1GHz turbo), Radeon Pro WX Vega M GL graphics with 20 units of processing and 4GB of HBM2 display memory. Codenamed "Kaby Lake-G", unified silicon allows for a thinner system design than a separate CPU and GPU solution. The \$1,679 base Precision offers a Core i5-8305G processor (available in a new window) with Vega M graphics, 8GB RAM, a drive 128GB Solid State Drive (SSD) and a single Full HD (1920 x 1080 pixels). The drive 2,890-dollar trial developed to Core i7-8706G, 16GB of memory (a low ceiling according to workstation standards, although Dell says 32GB configurations will soon be available), a 512GB NVMe SSD and a 4K touch display (3,840 x 2,160 pixels). The Company company Sent along with its \$99.99 premium active pen, a stylus that supports 4,096 levels of pressure and inclination control on Wacom 2.0 hardware. (It also works on AES 1.0 and Microsoft Pen Protocol 1.51.) The Precision 5530 2-in-1 is an aerodynamic silver aluminum plate, with a Dell Chrome logo centered in the lid. Its carbon fiber composite palm rest makes it look like a silver and black sandwich when closed. Measurements of the convertible (0.63 by 13.9 by 9.2 inches) correspond to the XPS 15 2 in 1. So it makes its weight of 4.36 pounds. This is easily three times the weight of a dedicated tablet, too much to hold in one hand and even a bit awkward to hold in two instead of resting in one lap. But it's easy to carry compared to life-size shell workstations like the Lenovo ThinkPad P51 (\$1,329.99 at Dell) (opens in a new window). (That one measures 1.02 by 14.9 by 9.9 inches and weighs 5.6 pounds.) Its closest rival, the convertible HP ZBook Studio X360 G5, not yet tested here, is heavier (5 pounds) and a bit more bulky (0.74 to 14.2 to 9.7 pounds). On the left edge of the system, you'll find two Thunderbolt 3 ports with USB Type-C and DisplayPort functionality, as well as support for the latest external storage, docking and graphics solutions. There is also a microSD card slot and a small button with a row of LEDs that acts as a battery indicator. Two C-compatible USB ports, such as the Thunderbolt 3 ports, with the supplied AC adapter-are on the right side, along with an audio jack and a security cable lock slot. Missing in Action: an HDMI output and any standard USB Type A ports. Hold your chin on two 360-degree silver zippers allow you to open the lid, revealing a screen with the super-thin infinityedge frames of the Dell XPS 13 and XPS 15 families so thin that there's no room for the webcam Facial (there is also a fingerprint reader) in its traditional place above the display. Instead, the camera is centered under the logo of the screen, then while its images images With details higher than the average and well enlightened, they will give your Skype colleagues a good view of your chin and your nostrils. "Above the average in detail and well enlightened" is an understatement when it comes to the anti-glare 4 touch screen of the Precision. It is a beauty, with a large brightness (also with the lower backlight of different notches), large vision angles, thin lines and sharp image elements such as the 4K resolution can make them. The pop colors any range of colors is chosen. The premiercolor software supplied offers a menu by Adobe RGB for printing, sRGB for the web and DCI P3 for cinema, among others, and allows you to precisely adjust the brightness, contrast, range and color temperature. Photos, videos and 3D rendering all seem formidable. The other met of the audiovisual equation is equally powerful: the twin speakers on the bottom of the system can easily fill a medium-sized room with high lights and strong half-haired, if not many bass. A volume level of 70 or 80% is sufficient for most listening, and the cooling fan rarely and silently turns so as not to disturb you. The 2-in-1 Low profile of the keyboard lacks a numerical keyboard (and its touchpad is missing a central mouse button for ISV applications), but it provides dedicated home, end, UP page, and page down keys, more cursor arrows in the correct inverting-t arrangement instead of a line. The sensation of beating is superficial but snappy, with slightly rigid feedback, flipping-a-switch and a thread of shots while you press the keys. As I said, the Dell has the dimensions and weight of a replacement of the desktop (and its side frames are too thin for the handles), so it is great when resting on a table for a presentation is clumsy when kept like a tablet. Resting on a lap or a desk in tablet modality, elognov elognov el noc ossap li ereneT omrehcs ollus gniredner ied essalc amirp id kni swodniW erutacram odnenrof e aenij id irosseps isrevid odnangesid icolev Aip ihccobaracs ilg e iploc i noc ossap li eneit omitluatseuQ asotsoc anep al rep omlep led ottegir etnellece nu odnenrof .eneb anoiznuf elibitrevnoc li eretop li odnettem .eud i eramloc rep enoizader id atlecs anu 0355 noisicerP alla otad omaibba .ipac o itneilc a gniredner ilat erartsom rep ettada ereggel Aip Atinu otilos id e .isselpmoc gniredner e oroval id issulf errudorp id odarg ni itnasep illedom otilos id .eirogetac eud ni etnemavitamissorppa edividus is elibitrevnoc avitanretla noitatskrow anU .evortla ihrec es aznetsiser Aip eravort ioup am .etturb orevvad onais azzem e ero ettes ehc nonAAairetab alled atarud al atut rep odicimo nu onos K4 imrelics ilg ehc atlov amissenel rep otarismid otats A luc ni .otagellocs oediv enoizudorpir id tset ortson li otats A arret a otudac A luc ni otstop ocinu' .oerC rep ehc ennarf .0353 la ottepsir opicina ni etnemadomoc ibmartne .skrowidiloS e ayaM ni etnemavittepsir sp777 e sp38 elibatiderca nu otacilbup ah am .jodnoecs la emarf H1 oerC ad tesweiv nu azzilitu ehc noitatskrow frepweivEPS kramhneb len otneel etnemlibiderci otats A 1-ni-2 0355 li .noeX us itasab 0353 noisicerP lteD ied idnoecs 641 ia oniciv e 25P ied idnoecs 112 ied amirp neb .idnoecs 451 ilos ni noitatskrow alled ocificeps yaRVOF gniredner id oroval id ossulf li otatelpmoc aH .25P daPkniHT ovoneL ien 005P ordauQ level-yrtne olleddom li otiploc ah am .0355 noisicerP allom a llehs allen 0002P ordauQ UPC al noc elibitapmoc esse avetop non ametsis led XW orP noedaR acifarg adehcs aL .itnerrocnc inucla id ies a UPC eroc orttauq olos otallabmi aibba etnatsnon .ekarbdnaH oediv oiggnatnom id oizicrese ortson len otunim nu id erettab ad eliciffid onges li ottos otalovics ehcna A .K4 yalpsid ous lad etsopmi ilareneg eseps elled asuac a etnematrece isauq .8 kraMCP ociffu'iled Ativittudorp id tset ortson len itnellece omairedisnoc ehc itnup 000.3 i ottos ocop otalovics A ametsis li .inoizatserp id inimret ni otnemirefr id itnup irporp i otunetnam ah 1 ni 2 0355 noisicerP .51 SPX id 1 ni 2 erotinegorp la ertlo .etelpmoc inoisnemid id e etillens ilitatrop noitatskrow id ammag alpma'nu id etnorf a ln a short time more than four pounds. The 5530 2-in-1 is not so powerful, but throws the design that can be converted into the mix, even if what is a light commendable weight for a spring shell is on the heavy side for a tablet. Also so, the precision 5530 2-in-1 fills a nice niche in in Workstation world. Especially when buying 32 GB of memory, it will be the best choice to present animations and mark the images. Dell Precision display 5530 2-in-1 pro glare. Two Thunderbolt 3 ports and two USB-C. Almost perfect pen input. Heavy and bulky cons of tablet modalities. 16 GB of ceiling ram. The 4K screen damages the battery life. The positioning of a webcam makes you look like a fucking head. The basic line of the Precision 5530 2-in-1 takes the convertible XPS 15 2-in-1 of the company and transforms it into a portable workstation with solid performance and a 4K draft touch screen, even if, like all hybrids from 15.6 inches, it is too heavy for the use of tablets.
